**Subject:** Preliminary Data CSO Program

Good Afternoon Alice

Please see attached for preliminary data for the CSO Program. Below is the breakdown of the data shown in the attached table.

- Dioxin, PCB Congeners, Pesticides for WW, and HSM dissolved fractions from Event #2, Attempt #2 (December 2013 attempt)
- Herbicides- concentrated sample runs which Tierra requested for LSM dissolved. These samples were required to be concentrated and re-analyzed if non-detects originally occurred.
- HSM Liner lot Check (HLLC) is a concentrated Herbicide run as well. We had received non-concentrated herbicide data for this lot check previously
- TSS/TDS LSM Bulk samples from Event #2, Attempt #2, and TSS/TDS monitoring samples from the same event.

Please let me know if there are any questions.

Thanks

Brian Mikucki
